Education

- **Diploma in Computer Engineering**
 - Aug 2020 to May 2023

K D Polytechnic, Patan
- **BE in Computer Engineering**
 - Aug 2023 to Persuing

Hansaba college of engineering & technology, Sidhpur

Key Skills

- **Technical Skills**
 - PHP with Server Side Dev
 - MySQL Design and Optimization
 - MVC Architecture
 - Full Stack Web Development
- **Full Stack Technologies:**
 - HTML, CSS, JS and Bootstrap
 - Responsive Web Design
 - Performance Optimization
 - Bootstrap5 and Versions
- **Programming Languages**
 - PHP
 - JavaScript, C, C++
- **Additional Skills**
 - Unity Software and Animations
 - Virtual Reality (VR) Activities
 - Augmented Reality (AR) Activities
 - Interactive Activities Development

Certification

- Completion of **Web development** Course at **NSIC**, Rajkot - **2022**
- Participation in **SSIP** Programme at Ganpat Uni, Mahesana - **2022**
- Completion of **Finishing School** at K D Polytechnic, Patan - **2023**

Objective

Detail-oriented PHP Developer with experience in building and optimizing scalable web applications using Core PHP, Laravel, MySQL, HTML, CSS, and JavaScript, achieving 30–60% reduction in website load time. Strong background in Unity-based Virtual Reality (VR) and Augmented Reality (AR) development, with a focus on interactive, performance-driven applications and efficient system design.

Experience Journey

- **FotonVR** • Mar 2024 - Nov 2024
 - **3D Artist**
 - Proficient in Unity animation tools and techniques, leveraging them to create engaging, interactive learning experiences.
 - Developed branching narratives and interactive elements within Unity animations to increase learner engagement.
 - Designed, prototyped, and tested interactive VR/AR experiences that utilize 3D animation to foster a deeper understanding of complex concepts.
 - Researched best practices for integrating 3D animations within VR/AR environments for effective educational delivery.
- **Envintra Solutions** • Nov 2024 - Present
 - **PHP Developer | Lead Full Stack Developer**
 - Designed, developed, and deployed scalable web applications using PHP, MySQL, JavaScript, HTML, and CSS in production environments.
 - Built and maintained secure, efficient server-side logic using Core PHP, ensuring reliability and maintainability.
 - Reduced page load time by 30-50% through PHP optimization, database indexing, and front-end performance improvements.
 - Improved application stability and scalability, supporting high-traffic environments with optimized server-side logic.
 - Optimized MySQL queries, and minimized server response time to improve overall system performance.
 - Worked across the complete SDLC, including development, testing, deployment, and maintenance, using Git-based version control.

Projects

- **YagnaPooja E Services** including all 3 user portals
- **Envintra Solutions** company website with Admin Panel
- **Majisa Web Services** company website With Admin Panel
- **Student's Attendance Management System**
- **Placement Management System**
- **Keshar Bhavani Industries**
- **Portfolio Websites** With responsiveness Management
